

Dear Friends,

You are invited to join in a global effort to bring peace to the world. Please read, and if you can, sign the "World Peace Treaty".

The "World Peace Treaty" belongs to the world. Please gather as many signatures as possible. We would like to take a global collective declaration of peace to the United Nations and the Hague. We are seeking an acknowledgment that they need to seek other alternatives to technological warfare and that they have the support to seek those alternatives from a global body of people rooted in peace from all nations.

We are asking that copies of the "World Peace Treaty" be taken to all villages that have had no voice..... all of the towns..... all of the places, where people wish to be heard and acknowledged.

It is important to understand that the World Peace Treaty is separate from treaties based on economic, religious, or territorial concerns.

This Treaty is a call to the People of the World to seek and affirm peace first and foremost to one another. It is intended to show all governments of the world that the instruments of war are no longer the sounds we will allow to be played. They must, for the sake of all creation, learn a new song.

And, this song must be one of peace in which each and every one of us from all over the earth are the instruments that will be heard in our symphony of life.

This is not an academic peace treaty. We would ask for the signatures of the birds, the trees, and of all the creatures of the earth if it were possible. And so, each of our signatures is also their signatures.

Thank you for your support and your help. If you would like additional information, please contact us. We hope to gather as many original signatures as possible and ask that you send us the signatures which you collect in hard copy form. Our contact information is listed below.

"World Peace Treaty"

We the people of the earth, recognize that peace belongs to the individual as well as the whole. We acknowledge our governments and their aspirations. Yet, peace is truly the individual's right and responsibility to seek and affirm.

I put down my signature and my word, that from this moment to the end of time, I will not blindly raise arms against my brothers and sisters. I will no longer send my children to be lost for concerns that are not in the interest of world peace. I do not turn away from my nation; only war.
